Portfolio Website:

PROFESSIONAL SUMMARY

Motivated and detail-oriented Software Engineering student at Murang'a University of Technology with practical experience designing and developing software solutions using Python and modern development tools. Experienced in building web applications, authentication systems, portfolio management platforms, encrypted messaging systems, and database-driven applications.

Passionate about software architecture, artificial intelligence, cybersecurity, and building technologies that solve real-world problems. Strong problem-solving abilities, self-learning skills, and a commitment to producing maintainable and scalable software systems.

EDUCATION

Murang'a University of Technology

Bachelor of Science in Software Engineering

Kenya

Relevant Areas of Study:

- Object-Oriented Programming
- Data Structures and Algorithms
- Database Systems
- Software Engineering Principles
- Web Development
- System Analysis and Design
- Computer Networks

- Operating Systems

TECHNICAL SKILLS

Programming Languages

- Python
- JavaScript
- HTML5
- CSS3
- SQL

Frameworks and Libraries

- Streamlit
- Flask
- Socket.IO
- NLTK

Databases

- PostgreSQL
- Supabase
- MongoDB

Development Tools

- Git
- GitHub
- VS Code

Concepts

- Object-Oriented Programming
- Authentication and Authorization
- Session Management
- API Integration
- Database Design

- Encryption and Secure Communication
- Version Control
- Responsive User Interface Design

PROJECTS

1. Pro_Law Portfolio Management System

Designed and developed a portfolio tracking and management platform that enables administrators to create users and assign portfolios to individual users.

Features

- User authentication and login system
- Session management with timeout control
- Administrative user management
- Portfolio assignment functionality
- Dashboard interface
- Database integration with Supabase
- Secure access control

Technologies Used

- Python
- Streamlit
- PostgreSQL
- Supabase
- Git

2. Argis Messaging System

Built a secure messaging platform supporting communication between users through a client-server architecture.

Features

- Real-time messaging
- Authentication system
- Flask-based server

- Socket communication
- Persistent chat functionality
- Multi-client support

Technologies Used

- Python
- Flask
- Socket.IO

3. Lawstream

Developed a movies and TV show streaming website that allows only active accounts to watch movies and TV shows.

Features

- Access control
- Client-server communication
- Secure data exchange
- User authentication

Technologies Used

- HTML
- CSS
- JavaScript
- Node.js
- Express
- MongoDB

4. Pet Shopping Site

Contributed to the creation of a pet shopping site. The site allows guests to browse various pets available then requires account login for features like adding to wish list and making purchases.

Features

- Access control

- Interactive UI
- Realtime feedback update
- Invoice generation

Technologies Used

- HTML
- CSS
- JavaScript

SOFTWARE DEVELOPMENT EXPERIENCE

Application Design

- Designed modular software architectures.
- Developed reusable and maintainable code structures.
- Implemented authentication and session handling systems.

Database Development

- Designed relational database structures.
- Integrated applications with Supabase and PostgreSQL.
- Managed user information and application data securely.

Version Control

- Used Git and GitHub for source control.
- Managed repositories and project history.
- Applied best practices for software collaboration.

Security Practices

- Implemented authentication mechanisms.
- Managed sensitive information using environment variables.
- Practiced secure coding principles.

SOFT SKILLS

- Analytical Thinking
- Problem Solving

- Team Collaboration
- Communication Skills
- Adaptability
- Self-Learning
- Time Management
- Attention to Detail

INTERESTS

- Artificial Intelligence
- Software Development
- Cybersecurity
- Web Application Development
- Mobile Application Development

CAREER OBJECTIVE

To grow as a software engineer by applying technical knowledge and creativity to develop innovative and reliable software solutions while continuously expanding expertise in artificial intelligence, full-stack development, and secure systems engineering.
